

Case History: Hamburg Public School, Hamburg, New Jersey

Hamburg Public School is located in northwestern New Jersey.

Evergreen Bleachers™ replaced old bleachers (which were also four rows high). Hamburg school officials were concerned about damage to understructure due to climbing.

Installing Century Design® runners on foot level aisles. Picture shows a full complement of code-compliant features: closed deck, end rails and P-rails.

Permanent ADA cut-outs were installed at both ends of bleachers. Plastic seat modules, and railings are in the Hamburg school colors.

Officials at the Hamburg Public School received a cost-effective solution to their needs, with telescopic bleachers that are covered by a 20-year renewable warranty for the understructure, motor systems and plastic seat modules.
